Лабораторна робота №9

Використання у проекті C++ модулів на асемблері

Мета: Навчитися створювати програми на C++ з використанням модулів на асемблері

Роздруківка тексту програми

```
Longop.h
extern "C"
{
    void Add_LONGOP(long bits, long *pA, long *pB, long *dest);
    void Sub_LONGOP(long bits, long *pA, long *pB, long *dest);
    void Mul_N32_LONGOP(long counter, long N, long *pA, long *res);
    void Mul_NN_LONGOP(long aLen, long *pA, long bLen, long *pB, long *res);
    void Div_N32_LONGOP(long aLen, long *pA, long nDivider, long *res);
}
```

```
Module.h
extern "C"
{
    void StrHex_MY(long bits, long *src, char *dest);
    void StrDec_MY(long bits, long *src, char *dest);
}
```

```
Lab09.cpp
void lab09Func(HWND hWnd)
{
    const long len = 1;
    long oA[len] = { 0x00010001 };
    long oB[len] = { 0x00001001 };
    long oC[len * 2] = { 0x00010001, 0x02100022 };
    long oD[len * 2] = { 0x00010001, 0x20010003 };

    long oAB[len * 2] = { 0, 0 };
    long res1[len * 2] = { 0, 0 };
    long res2[len * 2] = { 0, 0 };

    char TextBuf[len * 2 * 32];
    Mul_NN_LONGOP(len, oA, len, oB, oAB);
    StrHex_MY(len * 2 * 32, oAB, TextBuf);
    MessageBox(hWnd, TextBuf, "Результат A * B", MB_OK);

    Add_LONGOP(len * 2, oAB, oC, res1);
    StrHex_MY(len * 2 * 32, res1, TextBuf);
    MessageBox(hWnd, TextBuf, "Результат A * B + C", MB_OK);

    Sub_LONGOP(len * 2, res1, oD, res2);
    StrHex_MY(len * 2 * 32, res2, TextBuf);
    MessageBox(hWnd, TextBuf, "Результат A * B + C - D", MB_OK);
}
